CHANGE REQUEST LOG

CHANGE ID	DESCRIPTION	IMPACT	STATUS
CR001	Converted the <code>'Date'</code> column to the ISO 8601 standard (YYYY-MM-DD).	Standardized 100% of transaction dates, ensuring cross-system consistency.	● Resolved
CR002	Imputed missing values (Nulls) in the <code>'CouponCode'</code> column with <code>"N/A"</code> .	Preserved transaction records and avoided listwise deletion.	● Resolved
CR003	Rounded pricing columns (<code>'UnitPrice'</code> , <code>'TotalPrice'</code>) to 2 decimal places.	Standardized numeric precision for financial accuracy.	● Resolved
CR004	Removed exact duplicate rows across the entire dataset.	Eliminated inflated transaction counts while preserving unique items within identical Order IDs.	● Resolved

CHANGE ID	DESCRIPTION	IMPACT	STATUS
CR005	Applied the <code>TRIM()</code> function to all text columns.	Ensured data consistency and prevented hidden duplicate categorizations caused by leading/trailing whitespaces.	● Resolved
